

Minotaur Software Ltd.

Reliable Software Solutions

Customer Name: Sweet Creations
Customer Type: Food Manufacturer
Address: 120 Carlauren Rd., Units 11-12
Woodbridge, Ontario L4L 8E5

The Client's Situation

Sweet Creations is a manufacturer of Palm Leaves, a pastry product and European style cakes. In 1995 they implemented the Minotaur Business System. Prior to implementation, their invoicing, inventory and financials were done manually on paper. When year-end approached, they rushed to insert their sales invoices into Accpac so their accountant could prepare their financial statements. The batch processing proved to be a lengthy and tedious process and invoices were difficult to edit once posted. Sweet Creations realized they needed a system that integrated and allowed for edits to be made to both their invoicing, inventory and financials.

The Minotaur Solution

Accounts Receivable, Accounts Payable, Invoicing, General Ledger, Purchasing and Inventory Control were the modules that Minotaur implemented for Sweet Creations. These modules simplified the invoicing and statement process, which in turn assisted in better organization for the company. The system is fully integrated allowing Sweet Creations to eliminate batch posting.

The real time posting is much easier than the batch posting they were used to. This saved Sweet Creations a lot of time and labour. The inventory is simple to track and histories are available from any period of time. Minotaur customized Sweet Creations invoices and cheques to their specifications.

Overall, less man power is needed to run the office, the accountant spends less time sifting through paperwork and the inventory and stock levels are more manageable, which means time and cost savings for Sweet Creations.

The Benefit

Since the implementation of the Minotaur Business System, Sweet Creations has saved on both labour time and money. Since the implementation of The Minotaur Business System, Sweet Creations now saves over four hundred hours a year on administrative labour, their labour costs have been cut by approximately five thousand dollars, and they have reduced their inventory carrying costs by two thousand dollars annually. Since 1995, Sweet Creations annual sales have quadrupled, hence they have saved a large sum of money over the years due to the implementation of The Minotaur Business System.
