

Minotaur Software Ltd.

Reliable Software Solutions

Integrated Point of Sale

Minotaur continues to provide our customers with solutions to better manage their business. For manufacturing and distribution businesses who also operate a retail store, a fully integrated computerized store checkout system will enhance business management through improved inventory controls and transaction processing. Store transactions and inventory remain identifiable yet fully accessible from within the core system.

As with all Minotaur Software modules, all point of sale transactions impact the relevant areas of the system from the sales journal and inventory to the general ledger in real time. Management and Operations are able to monitor all aspects of their business at their convenience and without the delay often experienced by those companies whose store inventory is not fully integrated.

Important Features

- Product labeled with Minotaur System generated bar code labels can be scanned for easy checkout.
- Monies are tracked by payment method and change calculated. ie. Visa, mastercard, cash, etc.
- End of day reconciliation report. This can be run by till and summarizes sales by payment method allowing you to easily reconcile your cash drawer, visa, mastercard, etc.
- Full integration combined with real time transactions allow for improved inventory management.
- Minimum inventory levels can be established for the retail store which feed inventory requirement and planning reports.
- *Have a rush customer order but low stock in the main warehouse?* Having the store inventory integrated into your system will enable staff to easily locate available product, ship or perform inventory transfers as required thus providing superior service to your customers.

Till Opening Balance:	200.00
Cash Total:	673.95
Ending Balance:	873.95

Hardware Requirements

Minotaur will be happy to consult with your hardware provider to review the specifications of your scanning device purchase for optimal use with Minotaur's point of sale module—we do not sell hardware but can direct you to hardware providers that other Minotaur customers have used successfully. We have experience printing to several models of label printers and are happy to test any existing hardware in our office for compatibility.

**Retailers use Moneris style systems to process credit and debit cards with their Minotaur POS system.

Would you like to manage your retail outlet with the same efficiencies as the rest of your business ?
