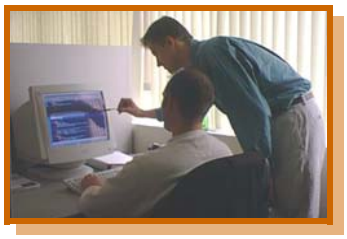
Minotaur Software Ltd.

Reliable Software Solutions

Job Costing

The Minotaur Job Costing module provides the custom job manufacturer or job oriented professional office with a comprehensive job control system that allows for the tracking of expenses accrued to jobs and reporting of job costs and budgets. The fully integrated Minotaur system automatically posts costs from the Accounts Payable, Inventory, Manufacturing, Payroll, and General Ledger module to the jobs, so costs in each area can be easily and accurately evaluated. The result: with control of all your job costs, you can reduce your variable costs and thereby increase profitability, with minimal data entry.



Important Features

- Integrated with other Minotaur modules
- Budgeting by job
- Report on budget's vs. actual costs
- Employee breakdown report

Additional Features

- Integrated with other Minotaur modules. Costs post to jobs automatically from Accounts Payable, Payroll, Inventory, Manufacturing, and General Ledger. Costs can also be directly applied to jobs from within the Job Costing module.
- Estimate accurately for jobs. Budgets can be assigned by category and time period.
- Purchase parts for a job, or allocate parts to the job from Inventory, and return unused materials.
- Include employee benefits with Payroll costs posted to jobs.
- Show detailed costs for a specified time period on job reports, to quickly identify and isolate problems.
- Split cost transactions between unlimited number of jobs, in varying amounts.
- Full audit trail of costs, with line by line costs shown for each job.
- Unlimited number of cost items and categories per job.
- Shows unit (ie. hour, quantity, etc.) and dollar cost on job reports.
- Sort list of jobs by job number or by customer
