

Minotaur Software Ltd.

Reliable Software Solutions

Canadian Payroll

The Minotaur Payroll module is a complete Canadian payroll management system. You can maintain a comprehensive employee file with full detail of each payroll. Minotaur automatically calculates the correct deductions and earnings for each payroll, and records the information for subsequent ROE and T-4 purposes. The result: Minotaur Payroll module enables you to maintain an efficient, accurate payroll department.

Highlights

- Preprogrammed with government tax rate tables
- Handles various payment types
- Detailed Time Sheets, can be imported from a time card reader
- Monthly Remittance Summary and T4 generation

Additional Features

- Automatically deducts appropriate tax for remittance based on government tax rate tables. Minotaur updates rates program whenever the government changes them.
- A convenient Monthly Deduction Summary automatically displays CPP, EI, and Income Tax deduction figures, as well as EHT amounts, to remit to the government.
- Earnings Types (ie. Regular, Overtime, Double Overtime), Benefits, and Deductions can all be defined by the user, and are flexible.
- Time Sheets can be entered in detail or in summarized form.
- When used in conjunction with the Manufacturing Module, time sheet data can be tied to specific production processes for inclusion in cost of goods.
- Labour reports show cheque, costing, deduction, and benefit information for each payroll, for one or a range of employees.
- When run in concert with the General Ledger, payroll figures automatically post to any number of payroll expense and liability ledger accounts.
- Manual Payroll feature allows the flexibility to post special payroll transactions.
- Flexible user-defined Pay Periods. System allows any number of different Pay Periods.
- Payroll can be posted for any date, and cheques can be dated with any date.
