

Minotaur Software Ltd.

Reliable Software Solutions

Touch Screen Production

Minotaur Software's Touch Screen Production Module with live weigh scale monitoring and bar code capable label printers is an efficient way of recording weighted product, as it is being made. Especially valuable in environments where using a keyboard is too slow, production areas are messy and wet or operators are wearing thick gloves.

Highlights

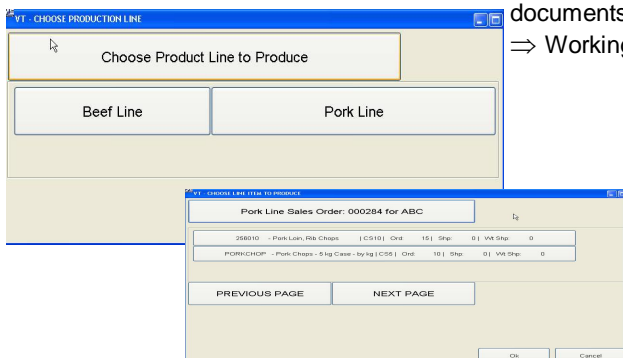

- Unique serial numbers are created for each item weighed with bar coded labels produced for scanning in the warehouse. Item catch weight is recorded.
- Labels produced to your specification can include customer name, customer code, order number, item code, item description, net product weight, production date and more
- Tare weights are utilized to ensure labels and production information reflect the actual weight of the product being produced.
- Improved accuracy on the production lines.
 - ⇒ Operators select orders and items to be produced.
 - ⇒ Avoids keying errors and over producing of items.
- Increased efficiency and accuracy for office staff.
 - ⇒ Production information is transferred live into your Minotaur system. No keying of information or transferring files.

Additional Features

- Product can be produced and allocated against a specific sales order or work order. When producing to fill a large order, multiple production lines can be working against the same order. Ongoing production data is available on screen.
- Operators are advised when they have produced the required quantity. Over producing is eliminated.
- Weight allowances can be utilized to advise operators if the product weight for a given case is outside the desired tolerance.
- Production information is captured real time in your Minotaur System.
 - ⇒ Working against a sales order, creates a shipment within the system allowing office staff to batch print invoices and packing documents containing individual case weights and serial numbers.
 - ⇒ Working against a work order, creates inventory for stock, freezer, etc.

Hardware Requirements

Minotaur will be happy to consult with your hardware provider to review the specifications of your scanning device purchase for optimal use with Minotaur's point of sale module. If you do not have a preferred hardware provider, we would be happy to connect you with one that other Minotaur customers have used successfully. We have experience printing to several models of label printers and are happy to test any existing hardware in our office for compatibility.
